

PARK IN PROGRESS - NUIT EUROPEENNE DE LA JEUNE CREATION

With this third edition of Park in progress, the Pépinières européennes pour jeunes artistes continue exploring new tendencies within the European scene by placing their research into an international perspective.

Constantly attentive to new trends, Park in progress offers this year to forty artists coming from Europe, China, Japan and Argentina the opportunity to encounter and joint new artistic proposals.

With this respect, Park in progress is rather a moment of sharing between artists in progress and public open to go in search of discovery. This choice is perfectly in phase with the map^{XXL} programme "encounter and joint creation" and Park in progress meets the requests of a young generation of artists, eager to confront artistic process, in quest for rich experience and new forms of expression.

Most of the selected artists are laureates of the Pépinières' mobility programme or have met during the former editions of Park in progress. Choreographers, cirque artists, magicians, video artists, performers, composers, laser designers, VJs, DJs, WebJs..., will launch upon a one week stroll through this park full of rare essences, of majestic trees and mysterious groves and draw up a night trek on June 24 from 8 pm till midnight.

Patrice Bonnaffé
